

AMENDMENTS TO THE CLAIMS

1. (Original) A diaminobenzene compound represented by formula (1) below.

(where R1 and R2 each independently denotes a hydrogen atom, alkyl group, or alkoxyl group.)

2. (Original) The diaminobenzene compound as defined in claim 1, wherein R1 and R2 each independently denotes a C1-20 alkyl group, C1-20 alkoxyl group, or C1-20 fluoroalkyl group.

3. (Original) A polyimide precursor which comprises repeating units represented by formula (2) below.

(where R1 and R2 each independently denotes a hydrogen atom, alkyl group, or alkoxyl group;
 "A" denotes a residue of tetracarboxylic acid; and n denotes an integer of 1 to 5000.)

4. (Original) A polyimide which comprises repeating units represented by formula (3) below.

(where R1 and R2 each independently denotes a hydrogen atom, alkyl group, or alkoxyl group;
 "A" denotes a residue of tetracarboxylic acid; and n denotes an integer of 1 to 5000.)

5. (Original) A polyimide precursor which is obtained by reaction between a diamine component containing at least 1 mol% of the diaminobenzene compound defined in claim 1 or 2 and a tetracarboxylic acid or a derivative thereof.
6. (Original) The polyimide precursor as defined in claim 5, wherein the tetracarboxylic acid or the derivative thereof is an aromatic tetracarboxylic acid or a derivative thereof.
7. (Original) The polyimide precursor as defined in claim 6, wherein the aromatic tetracarboxylic acid is a tetracarboxylic acid having phenyl groups or substituted phenyl groups.
8. (Currently Amended) A polyimide which is obtained by ring-closing reaction from any of polyimide precursors as defined in ~~claims 5 to 7~~ claim 5.
9. (Currently Amended) A charge carrier transporting film which is formed from the polyimide as defined in claim ~~4 or 7~~.
10. (Original) An organic transistor device which is the charge carrier transporting film as defined in claim 9.
11. (Original) An organic light emitting diode which has at least one layer of the charge carrier transporting film as defined in claim 9.

12. (Original) A fluorescent filter which is the charge carrier transporting film as defined in claim 9.

13. (Original) A liquid crystal alignment film which is the charge carrier transporting film as defined in claim 9.
